Digital Technology IT Solutions

INDEX

About Us

Digital transformation is a term used to describe the integration of technology into all aspects of business operations to improve efficiency, increase competitiveness and ultimately enhance customer experiences. It involves a fundamental shift in the way organizations operate, embracing digital technologies to not just mimic traditional processes but to revolutionize them. This includes the use of analytics, cloud, AI and automation, and other digital technologies to streamline operations and enhance decision-making. Fueled by the need to replace outdated processes and legacy technology, it enables innovation and brings about new technologies through digital transformation projects, such as cloud computing , artificial intelligence , big data analytics ,Internet of Things (IoT) and automation.

We Digital Technology IT Solutions are a team of experienced professionals who are dedicated and passionate about understanding our client's existing IT environment and enhancing them via Digital Transformation. Because we understand Digital Transformation is the key to remain Competitive in the market for every organization which is why we at Digital Technology IT Solutions mainly focus on Client's digital transformation journey and we ensure that the businesses have the latest technology which fundamentally changes the way a business operates and interacts with its customers.

Good after sales Service

Servers, Network and Data Center Solution

The global data center as a service market size was exhibited at USD 72.4 billion in 2022 and is projected to attain around USD 476.3 billion by 2032, growing at a CAGR of 20.73% during the forecast period 2023 to 2032.

As the IT infrastructure landscape gears up for a future of technological convergence, increased digitization and computing demands are the key market forces that affect the KVM switch and serial console markets, with data center growth driving sales for high port-count devices across sectors such as financial services, web and social network hosting, government e-commerce, telecommunications and healthcare, etc. With this demand for more servers and more services come new opportunities for solution providers to help businesses to align their data infrastructure with their strategic needs. Because it is almost impossible to know exactly the future needs of an enterprise, it is important that data center management solutions are flexible in terms of scale and new technologies. Already, tech-savvy businesses are demanding colocation providers that are able to evolve with them; no one wants to miss a new opportunity because existing technologies can't support new demand.

In most cases, while computing demand is increasing faster than IT managers can consolidate and faster than budgets are increasing an awareness of the evolution of technology applications, and the evolution of the customers using the applications, is essential to grasping how this will also start to redefine IT infrastructure, especially as it fractures into the realms of cloud, data center and managed services.

Servers, Rack, NAS, SAN and KVM Switch

There is no one-size-fits-all solution, and in this new era of opportunity, enterprise level corporations require innovative and sustainable data center solutions that allow their businesses to grow in an impactful way.

Digital Technology IT Solutions provides wide range of data center KVM, serial console and PDU solutions offer convenient, flexible, centralized remote access and management of IT devices in multiple data centers and distributed branch/remote offices.

Data Centers are the heart of the digital transformation considering the same Digital Technology IT Solution provides comprehensive network and data center solutions for our valuable client such as servers, windows server, SAN, NAS Storages, KVM, Data Center grade switches, Core Switches and access switches solution design to implementation and maintenance.

Network solutions design and implementation WAN, LAN & WLAN.

Data Security Solutions

Data is the lifeblood of every organization.
As your organization's data footprint expands across various cloud providers, SaaS applications and endpoints, your risk of a data breach also increases. Hackers and cybercriminals are seeking to exploit security vulnerabilities to access sensitive data that is spread across multiple cloud data centers and data stores.

Data security and compliance are two sides of the same coin. Complex compliance regulations, such as DORA, GDPR, CCPA, SOX, PCI, HIPAA and others, all have the same purpose: preventing unauthorized access to customers' and users' sensitive information.

Comprehensive data security solutions, whether implemented on premises or in a hybrid cloud, help you gain greater visibility and insights to investigate and remediate cyberthreats. These solutions can enforce security policies and access controls in near real time and help you meet regulatory compliance requirements, improving your data security posture.

We at Digital Technology IT Solutions are very concerned about the growing security risk and the data breach happening around world hence we educate the importance of Data Security to our client and make sure that our client has proper Data Security in place. Digital Technology IT Solutions are Specialized in Endpoint Security solutions, Anti Ransomware, threat intelligence, Firewall, UTM, Cloud Security, Email Security and Anti-Randsomeware solutions.

Firewall Solutions

Fortinet empowers its customers with intelligent, seamless protection across the expanding attack surface and the power to take on ever-increasing performance requirements of the borderless network today and in to the future.

Secure every endpoint of your network - from laptops to web and email traffic. Centralize Your Network Security with Sophos. Next-Gen Endpoint Security with Advanced Threat Prevention, Always-On Encryption, UTM Firewall Appliances Centralize Your Network Security with Sophos. Next-Gen Endpoint Security with Advanced Threat Prevention, Always-On Encryption and UTM Firewall Appliances.

Sonicwall don't just detect breaches, prevent them. Stop ransomware, encrypted threats and phishing attacks with SonicWall. Get the network security, control and visibility your organization needs to innovate and grow faster with our broad range of award-winning next-generation network firewalls.

Protect your organization from advanced security threats, gain greater security control, enhance productivity and lower costs with SonicWall network security services.

4

End Point Solutions

Symantec

Symantec provides security products and solutions to protect small, medium, and enterprise businesses from advanced threats, malware, and other cyber threats. Symantec's Endpoint Security family of products ensures that all endpoints in your organization's infrastructure are protected

kaspersky

Enterprise-grade endpoint protection Next-gen adaptive protection from cyber threats. Protects every endpoint without breaking the bank Streamlines centralized security management with a cloud or web console. Minimize the number of incidents by automated processing

ESET

Protect your organization against ransomware, phishing, zero-day threats and targeted attacks with our cloud-based ESET PROTECT platform. Enjoy automated, all-in-one defense—from endpoints to other potential threat vectors, including mobiles, email, web and cloud apps.

McAfee™

McAfee® Dynamic Endpoint will be comprehensive in its approach to securing endpoints. As a result of being fully integrated into McAfee's platform, its capabilities will help to ensure the health, integrity, and improved TCO of the entire security infrastructure. The endpoint does not live alone in an IT infrastructure. It coexists with many other security solutions.At any given time a computing compromise may occur rendering the IT infrastructure only as strong as its weakest link. Our McAfee platform approach will mitigate this risk.

INTERCEPT X

Sophos endpoint security combines the industry's leading malware detection and exploit protection with extended detection and response (XDR) to secure your entire ecosystem. Powerful AI using deep learning along with context-sensitive defenses will future-proof your organization against both new and old threats, and Sophos MDR provides advanced cybersecurity services from a team of Sophos experts 24/7.

TREND MICRO™

Trend Micro, a global cybersecurity leader, helps make the world safe for exchanging digital information. Fueled by decades of security expertise, global threat research, and continuous innovation, our cybersecurity platform protects 500,000+ organizations and 250+ million individuals across clouds, networks, devices, and endpoints.

Email Security Solution

Email security involves the strategic set of measures and techniques used to protect email-based communications effectively preserving the confidentiality, integrity and availability of email messages. As a critical safeguard for all types of organizations and professionals, email security prevents unauthorized access resulting in data breaches, detects and blocks malicious content, and ensures the privacy of sensitive information being transmitted. We at Digital Technology IT Solutions understand the importance of protecting our client email-based communications and to safeguard all critical client information hence we have partnered with leading email security provider such as **Sophos, Fortinet, Sonicwall, Symantec, Kaspersky and Trend Micro** to provide best Email security Solution in the Market.

Network Access Control

NAC software prevents unauthorized users and devices from gaining access to an organization's network. NAC authenticates users and devices and ensures that devices are compliant with corporate security policies. As the workforce has become more mobile and BYOD initiatives have become more prevalent, NAC has become an important part of the security stack.Today, NAC can play an important role in enabling Zero Trust security for highly distributed networks and hybrid workforces.

Smart Wireless Solution

Digital Technology IT Solution provides cutting edge wireless solution with security, reliability and unmatched roaming performance combined with lower running costs to meet the needs of modern digital organizations. We have partnered with the leading brands like **HPE, Aruba, Cisco, D-Link, Linksys and Sophos.** We serve Small and Large Enterprise such as Hotel, Restaurants, Hospitals, Schools, Auditoriums, Stadiums, Convention Centre, Airports and other Large Public Venues.

6

Structured Cabling Solution

Digital Technology IT Solutions understands the complexity involved in planning, Installing, maintaining data communication and Networking systems. Hence with our expert team we provide our customers with the best-constructed and well-designed data network and cabling installation. We provide end-to-end structured cabling with on-site distribution solutions. We will design, engineer, install and certify a complete wiring or cabling solution based on the customer's requirements. Our Scope in Structured cabling includes Structured cabling supplies and accessories, Data Network cabling design and implementation, existing cable re-arrangement.

IP Telephony

IP telephony in corporate environments are numerous but are mostly narrowed down to cost considerations related to infrastructure and monthly bills. IP telephony also enables your business to access advanced features without having to invest in extra hardware. VoIP also makes it a lot easier to integrate voice communications with your CRM and other business tools. The ability to centralize data and provide consistent customer service across multiple channels (at a lower cost) makes IP telephony and VoIP a no-brainer for many businesses.

Cisco IP telephony solutions are an integral part of Cisco Unified Communications, which unify voice, video, data, and mobile applications on fixed and mobile networks enabling users to easily communicate in any workspace using any media, device, or operating system. Cisco IP telephony solutions can be used to provide highly secure, reliable, scalable communications that take advantage of your LAN and WAN. Also, Improve employee agility and productivity through integration with innovative Cisco Unified Communications and third-party applications

AVAYA

Avaya works diligently to contact centers, allowing agents to switch between the telephone, instant messaging, chat, and other means of communication to provide more timely and more cost-effective service. It's IP-telephony enables employees to work from home, on the road or a business trip. Avaya IP PBX serves as the basis for a broad range of applications such as Self Service (IVR), Outbound dialing system (PDS) and Integrates with external databases (CRM). Avaya solutions can support more end-devices with IP-capabilities with fewer restrictions on the load and fewer calls to clustered servers.

D-Link

D-Link's core competency is in Ethernet connectivity. In fact, D link is a global leader in providing network connectivity solutions to small and medium-sized business. From the beginning, D-Link engineers have researched, designed and manufactured innovative, standards-based networking solutions. D-Link sell our state-of-the-art hardware at the best prices. Price may be the deciding factor for many new customers, but D-Link innovation, reliability and service keeps them loyal year after year. Whether it is to suit the needs of the home consumer, a business or service provider, we take pride in offering award-winning networking products and services.We will continue to lead the way in building networks for people around the world.

Panasonic

Panasonic IP telephones are easy to install and delivers the flexibility and reliability that are the hallmarks of Panasonic DECT technology, Panasonic IP telephones represents a sophisticated mobility solution. Panasonic IP telephones have a noise-reduction function which reduces surrounding noise and enhances the clarity of the conversation. Panasonic's IP Wireless DECT phone is remarkably easy to set up and to manage. DECT capability sets free from wire which can create communication environment that is entirely suited to the different places in which businesses operates, from the office out into the stock yard.

8

Automation Solutions

Automation is a key factor in the rapid evolution of the corporate landscape, businesses are adopting automation as a fundamental tool to stay competitive in the Digital World. We offer Marketing, CRM, Accounting and HR Automation Solutions.

- ➤ **Marketing Automation Solutions** streamline marketing activities, saving time and resources.
- ➤ **CRM Automation Solutions** automates sales pipelines, track client interactions and manages customer data.
- ➤ **Accounting Automation Solutions** streamlines book keeping, expense tracking and financial reporting.
- ➤ **HR Automation Solutions** saves time managing, employee data, benefits, payroll onboarding and attendance.

Automation is altering the future of business through technological advancement. Enhanced productivity and efficiency are significate advantages of automation, Businesses can achieve cost saving by automating activities reducing labor cost and eliminating errors. It also improves customer service by enabling faster responses and personalized interactions. Data driven decision making is facilitated by automation providing real time insight and analysis. It makes business more adoptable and agile in response to changing market conditions. Business should examine processes and identify areas where automation can streamline operations. Simply put automation can save time, reduce error, enhance productivity and allow focus on key tasks.

Enterprise Workflow Automation

Enterprise Automation: Modernize your organization for increased productivity and efficiency. Enterprise automation can sound like a massive undertaking, and it certainly can be. However, many companies have taken the strategic approach of biting off smaller, departmental (and even sub-departmental) automation projects while focusing on the larger goal of a fully-automated enterprise. Many of these projects fall under the broader framework of "Digital Transformation."

Enterprise automation is the systematic review of an organization's processes to ensure optimal performance while looking for manual processes that can be replaced with intelligent digital alternatives. We at Digital Technology IT Solutions have partnered with **Integrify.**

Robotic Process Automation (RPA)

Robotic Process Automation (RPA) is software technology that's easy for anyone to use to automate digital tasks. With RPA, software users create software robots, or "bots", that can learn, mimic, and then execute rules-based business processes. RPA automation enables users to create bots by observing human digital actions. Show your bots what to do, then let them do the work. Robotic Process Automation software bots can interact with any application or system the same way people do-except that RPA bots can operate around the clock, nonstop, much faster and with 100% reliability and precision.

Building Automation Solution

Building automation (BAS), also known as building management system (BMS) or building energy management system (BEMS), is the automatic centralized control of a building's HVAC (heating, ventilation and air conditioning), electrical, lighting, shading, access control, security systems, and other interrelated systems. Some objectives of building automation are improved occupant comfort, efficient operation of building systems, reduction in energy consumption, reduced operating and maintaining costs and increased security. We partnered with **Cisco and Honeywell** to provide our customer with cost effective solution for Building Automation.

CCTV Solutions

Digital Technology IT Solutions offers a comprehensive range of advanced security and surveillance solutions to meet the ever-changing requirements of different industries. At present, we are serving many different verticals comprising defence, government, hotels, hospitals, educational institutes, homes, infrastructure, and transportation among others. Digital Technology IT Solutions brings intelligent security and surveillance solutions that protect people, properties and assets.They ensure safety, security and productivity

in various industrial processes and help make the world safer. Our integrated security systems have been used in various situations and they deliver comprehensive coverage.
Control Room Solution

Control rooms usually combine multiple functions with various subsystems and equipment. They require efficient investigation and evidence across systems. Limited inter-application visibility and controls with difficult maintenance double the daily workload for security staff and IT departments. To solve this problem we offer Powerful, reliable storage and display with all subsystems unified on one platform for monitoring, incident handling, remote control, evidence and maintenance, making control room management simpler and more efficient.

Guest Room Control and Monitoring System

Quality of service is a key contributory factor to customer satisfaction. Which is why we have partnered with Legrand for guest room management system which enables you to quickly identify and respond to your customers' requirements (e.g. 'Do not Disturb', 'Make Up Room') via the BMS system and provide a service that is second to none. The Legrand system can act as the interface between the hotel's BMS and PMS. This integration allows staff to monitor the guest room status and to adapt room settings depending on the guests' requests, providing the optimum levels of comfort and energy saving. It can also manage the temperature, lighting, sockets, ventilation and curtains independently in each room. It can be integrated with the Building Management System (BMS) and the Property Management System (PMS) in order to enable global management of the building and the hotel's operations.

Access Control Solutions

We also offer Access Control System designed to meet unique access control needs of sites varying in size and scale from one door to thousand. Weather it's a small business or a large enterprise organization or sites with critically sensitive infrastructure we have solution that keep your people and assets safe. To Support our customer we have partnered with **ZKtec , Fingertec and TimeWatch.**

Time Attendance System

Time and attendance management is at the heart of workforce management. It ensures that employees with the proper skills are at the right place at the right time. Workforce management is essential to optimize organizational and employee productivity. Time and attendance systems (TNA) will help you track and monitor your employees in an easy way. As an employer, you will be able to track working hours, late arrivals, and early departures, as well as time taken on breaks. To Support our customer we have partnered with **ZKtec , Fingertec and TimeWatch.**
Audio Visual System

Our main aim is to ensure that our solution meets the requirement of our client. And we mainly focus on providing high quality audiovisual equipment at competitive price and good after sales service. Audio Visual Systems includes Conferencing Solution, Projectors, Loudspeakers, Control Systems, Digital Signage, Interactive whiteboard, Microphone, Audio Systems, Lighting ect.We have a good partnership with the leading Brands such as **Crestron ,ViewSonic and Logitech** to serve our customer with quality and competitive price.

PA System and Fire Alarm System

A public address system (or PA system) is an electronic system comprising microphones, amplifiers, loudspeakers, and related equipment. It increases the apparent volume (loudness) of a human voice, musical instrument, or other acoustic sound source or recorded sound or music. PA systems are used in any public venue that requires that an announcer, performer, etc. be sufficiently audible at a distance or over a large area. PA Systems are usually used in Hotels, Hospitals, stadiums, public transportation vehicles, facilities, manufactories, live events etc. Digital Technology IT Solutions understands these needs and has partnered with the Leading brand such as **TOA, Bose and Crestron**.

Digital Technology IT Solutions also helps client

to Integrate Fire Detection with Automatic Voice Evacuation and Public Address System. Automatic fire detection and voice notification is a system that combines fire detection technology with audible voice messages. It uses sensors to detect fires and triggers voice messages to provide clear instructions to occupants during an emergency. This helps in early detection, prompt communication, directional guidance, and customization.

Parking Management

Parking Management system reduces the time spent seeking for a parking space, prevents inconsiderate parking, block un allowed parking and to ensure that disabled customers get the spaces to which they are entitled. Using the intelligent/controlled car park management systems, customers can reserve spaces in advance by computer, tablet or mobile, selecting from all available spaces. A parking guidance system then shows the quickest route to a reserved space. Red and green lights above each bay show if they are reserved/occupied or available for use. Digial Technology IT Solution understands the client requirement and provides support in installing and setting up Parking Guidance System which helps to navigate the allowed parking space. Gate Barrier System which provides access to the gate. ANPR System which helps to see the car parking space and monitoring high traffic area also helps to increase security in the premises.

Visitor, Staff & Contractor Management Solutions

VISITOR ACCESS, CONTRACTOR MANAGEMENT AND STAFF MONITORING SOLUTIONS
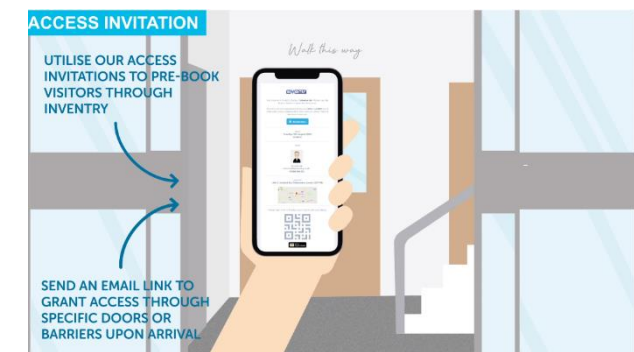

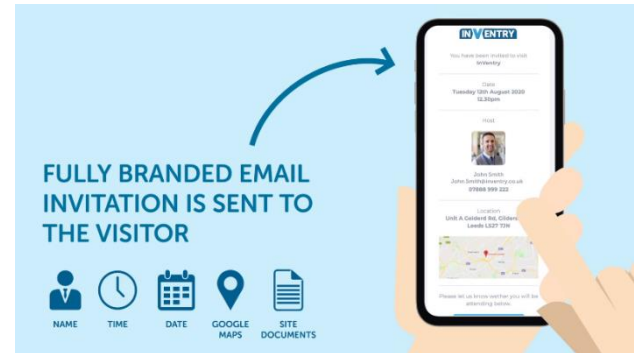

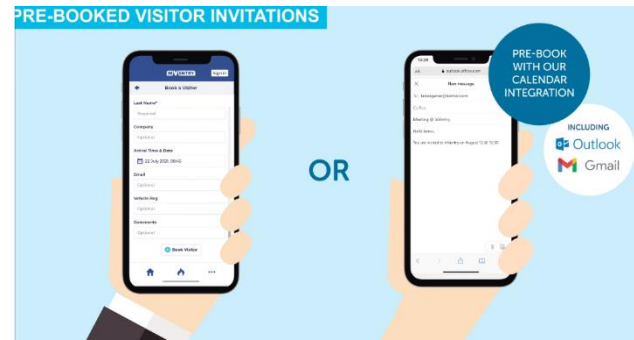

RECEPTION

Managing visitors in your Hospital, Schools & College or business can now be a seamless and speedy process with our market-leading visitor management system. This Visitor Management Software is perfect for large sites that have gates and barriers between the site perimeter and their main reception. It enables security staff to check a visitor's eligibility and mark them as arrived within the InVentry console straight from your organization's gatehouse.

Visitors' hosts will be notified of their arrival and they'll also be automatically added onto the InVentry Anywhere App, meaning evacuation lists are live and up to date. This feature not only allows large sites to accurately monitor when visitors have arrived at various entrances but will ensure a particular hard-to-manage site in an evacuation will be easier than ever!

InVentry allows schools and organisations to know which staff are onsite or offsite in an instant. Everything in our staff signing in system has been designed around speed and maximum flexibility, to meet staff needs and requirements. Staff records can be imported manually or pulled directly from your active directory for a seamless sign-in experience. When arriving at the staff management solution, staff only need to enter the first few characters of their name or select their photo from the touchscreen.

Alternatively, ID cards make the whole experience even faster by integrating with your existing systems. You can also collect sign-in and out information to monitor working hours and understand patterns via your on premise server or via the cloud – the ultimate hybrid solution for staff members.

InVentry's contractor management software is perfect for large sites with multiple gated entrances; it allows site staff to mark visitors and contractor sign-in activity straight from your organization's gatehouse!

Gatekeepers can mark visitors as present via the InVentry console part of the contractor sign-in software, as soon as they arrive at the gate which will automatically send a contractor management system notification email to the host informing them that their visitor has arrived. They will then automatically appear on the InVentry Anywhere App as soon as they've been marked as arrived, meaning evacuation lists have never been so easy to keep up to date.

We Digital Technology IT Solutions have a partnered with **InVentry's** to provide Visitor , Staff and Contractor Management System to all Schools , Colleges and Business in Oman and to ensure that visitors , staff and Contractors are managed seamlessly without much complexity.

Queue Management System

RSI Concepts provides organizations with state-of-the art Queue Management Systems. RSI Queue Management System or"RSI Queuing System" is a customer flow management system that allows you to organize your customers in an efficient and effective way on the basis of smart. Hence, we have partnered with **RSI Queue Management System** to serve customers from Telecom company, Banks, Healthcare industry, Government company and other companies.

POS Solution

A point-of-sale, or POS, system is a computerized network made of software and hardware components that process and record payment transactions between a company and its customers. You can think of a cash register that is traditionally used to accept payments, but a modern POS system is much more complex. Now, it's an essential tool that helps consolidate and optimize such areas of business management as sales through multiple channels, inventory management, customer management, and marketing. Besides, it serves as a crucial source of information that can be used for further analysis and decision-making.

POS systems are widely used in retail stores, restaurants -- and hotels. In this case, POS systems allow for collecting guests' orders and purchases from different points of sale and charging them directly to their room. We have partnered with Market leading POS System provider such as **Square**, **Zktec**, **Zebra** and **Citizen** to serve our customer with best POS system which is competitive in the Market.

Nurse Calling System

We offer most flexible and modular IP nurse call system. We have partnered with **Caretronic** and we offer Nursecare which is worlds #1 fully comprehensive, Smart, Interactive IP Nurse call System. When the patient calls the Nurse for help you want it fast, simple and reliable which is only possible with a modern nurse call solution. Nursecare is an intelligent communication system for health care institutions. It combines a nurse call system with nursing documentation management with new generation of modular sensor has the huge advantage of being entirely wireless. They are fast and easy to install featuring reliable advanced wireless technology. They are calibrated continuously and satisfy all international standards.

In additional to dependable call buttons, remotes and posturing alarms we can always add more advanced wireless sensors such as bed monitoring, movement sensors, pill dispensers, actively protect your more demanding patients, even in times when they feel nobody's is watching. It's important for your patients to be as active as possible which is why we have wireless hand transmitter where patients can safely enjoy the area outside their room always tracking their location and it allows them to call the nurse from anywhere and because it automatically calls assistance when a patient leave a pre-set protective boundary. Even patients with dementia can securely get some fresh air and its water proof and under unfortunate fall occurs the hand transmitter automatically senses the accident and calls the nurse for help to the location. Patients have more freedom while feeling more secure.

UPS Solutions

With its wide range of Uninterruptible Power Supplies (UPS), Digital Technology IT Solutions offers a competitive edge to businesses in need of first-rate power solutions. UPS designed to ensure that companies can protect their mission critical application by maintaining a steady flow of energy under adverse circumstances. Keeping this in mind Digital Technology IT Solutions has partnered with **Delta, APC, Eaton, Belden, Hubnextic and Triplite** to meet our customer demand and to ensure clients can protect their mission critical application by maintaining a steady flow of energy.

Printer Solutions

Digital Technology IT Solution has also made partnership with Leading Printer Brand in the market to provide printer solution at competitive price and best quality. Our Leading Printer Brands are **HP, Epson, Brother, Zebra, Kodak, Konica, Canon, Sharp and Fujitsu** etc

E-signature Solutions

Signotec and **Epadlink** are specialist in the field of Capturing hand written electronic signatures hence we Digital Technology IT Solutions have partnered with Signotec and Epadlink to serve all banks and exchanges with cost effective E signature Solutions.
Signotec E-signature Solutions:
Banks can now sign 95% of their daily documents electronically in a legally compliant and secure manner using a signature pad. Especially for the employees in the branches of the banks, this process enables an automatic synchronization of the signed contracts with the downstream systems. The risk of losing documents is eliminated

and the documents are quickly available for further processing. If further signatures are required in the back office, this can be mapped with the signotec signature solution. In addition, documents can be postponed to be supplemented at any later time, regardless of location and time, by further signatures.

ePadLink E-signature Solutions:

ePadLink electronic signature pads (ePads) are pen input devices that capture hand-written signatures for use in PC applications. Designed to mimic the natural feel of signing on paper, the ePads can be used on the desktop, yet are small and light enough to take on the road. Forms requiring signature approvals can now be completed and stored electronically. For secure transactions, the details of a signature can be analyzed to confirm the identity of a signer. With the ePad product family, it's easy to add signatures to electronic documents, anytime, anywhere!

Alternative CAD Solutions

We have Partnered with **BricsCAD** and **ZWCAD** to provide cost effective and quality CAD Solution for architects, builders, engineers, designers and manufacturers. ZWCAD is a fast and powerful 2D CAD solution that offers unparalleled compatibility with AutoCAD It empowers architects, engineers, and designers in the AEC and manufacturing industries to effortlessly bring their creative visions to life. Highly compatible with DWG, DXF, DWT, and other common file formats. Familiar interface, commands and aliases. Choose from Classic or Ribbon, Dark or Light. Develop or migrate third-party applications easily with APIs including LISP, VBA, ZRX, and .NET. Easily migrate your printers, templates, fonts, command alias and hatch patterns.

BricsCAD on the other hand provides with a alternative CAD Solution for Engineers, Architects, Manufacturing Professionals, General Contractor, Surveyors, Design Professionals, Subcontractors and Civil Engineers.
BricsCAD provides engineers with a CAD alternative, open to industry-specific partner applications for capturing and documenting 2D and 3D designs faster. BricsCAD offers all the familiar CAD features and innovative tools for higher productivity at a lower cost.
BricsCAD provides architects with a CAD alternative to create 2D drawings faster, which is expandable to CAD-based BIM. Build models from point clouds or create new designs in 3D with automated 2D documentation in a single, familiar DWG-based environment.

Efficient 2D and 3D capabilities allow for quick layout and retooling of manufacturing facilities, as well as reworking of drawings for production. BricsCAD combines a familiar environment, low cost, and a highly productive tool set.

Microsoft Products and Services

Digital Technology IT Solutions offer Microsoft volume licensing, Windows, office, SQL Server, Cloud product such as Office365 & M365 , other Cloud Solution Products and Desktop , Laptop and other accessories.

Airport Security Solution - Smiths Detection

Providing the full range of solutions to meet changing airport security needs.
Airports, airlines and authorities around the world trust Smiths Detection's deep expertise in delivering integrated solutions that provide the security, operational efficiency and scalability that they need to keep their passengers, customers and infrastructure safe from threats. Which is why we Digital Technology IT Solutions have partnered with Smiths Detection's to support and understand the requirement and enhance the security and operational efficiency, scalability for the Aviation Industries in the Middle East.

Checkpoint Solutions

New regulations. Increasing passenger numbers. Exacting business goals. Three challenges that demand more complex checkpoint-security solutions. Today's checkpoints need to be flexible, ready for the future with reliable and effective interfaces, driven by sophisticated network monitoring that increases productivity and mitigates operational risk.

Integrated checkpoint solutions from Smiths Detection are tailored to help you build a smooth passenger experience, improve efficiencies, deliver the security needed to protect people and infrastructure. Our industry-leading service technology and personnel are available for the lifespan of your equipment, providing support from planning and design to implementation, training and beyond.
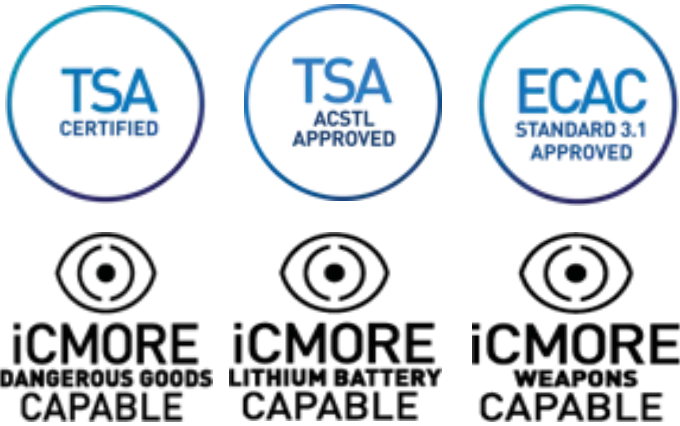

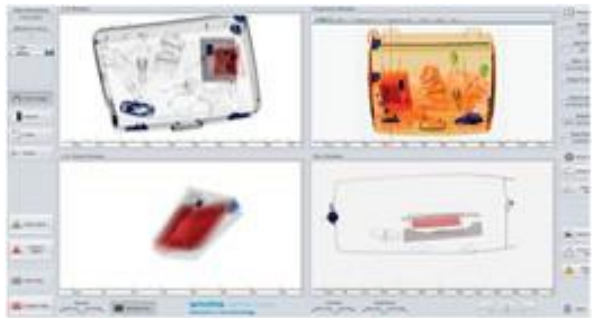

Hold Baggage Solutions

Passenger travel and air cargo volumes are increasing rapidly. So are security threats. New regulations require more powerful and intelligent systems to detect a wider range of substances and dangerous goods – wherever they might be hiding. Smiths Detection is leading the industry in the development of hold-baggage screening (HBS) equipment, with comprehensive solutions that deliver the highest levels of security and operational efficiencies. Our HBS solutions offer the flexibility and scalability to meet the

HI-SCAN 10080 XCT
Advanced CT explosives detection system

multi-airport operations alike. And our deep understanding of detection technology, regulatory compliance, and service means you have innovative solutions built to last, ready to handle the detection, business growth, and regulatory demands of tomorrow.

Complying with current TSA and ECAC regulations, the HI-SCAN 10080 XCT is a next generation high-speed, explosives detection system for hold baggage and air cargo.

Air Cargo Solutions

Air cargo security is a closed circle, in which shippers, forwarders, airlines and industry authorities work together to ensure that all air cargo worldwide is always subjected to the same thorough security checks everywhere.

Smiths Detection sets the standard for air cargo security. From start to finish, we'll deliver the operational efficiencies, security and system reliability you need to ensure your goods get to where they need to go. Our comprehensive range of detection solutions routinely fulfil and exceed international legislative requirements for air cargo screening.

An X-ray scanner designed for the inspection of large scale consolidated and palletised goods, ideal for cargo inspection.

HI-SCAN 10080 XCT
Advanced CT explosives detection system

Port & Borders Security Solutions

Securing Sea & Land Borders
Digital Technology IT Solutions partnered with Smiths Detection to provides threat detection and security screening technologies for ports and borders that limit illegal activities, without affecting global trade. In the face of escalating cross-border smuggling, authorities need rigorously to monitor imports, exports, transit traffic and people for illicit goods and dangerous materials.

Sea Port Terminals

The equipment enhances port security by providing customs authorities with the flexibility to quickly identify unwanted goods and threats. Our fixed and mobile screening equipment provides faster clearance times, relieving pressure on resources and ensuring the continuous movement of goods.

HCVP - Drive through portal
An automatic, drive through scanner portal for the inspection of vehicles and containers, guaranteeing constant vehicle flow on site.

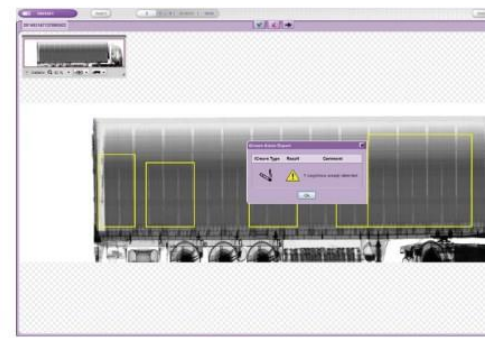

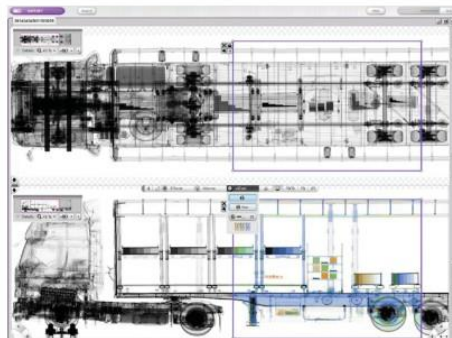

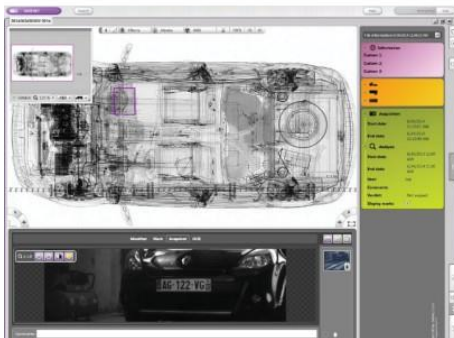

Land Border Crossing
We help keep traffic moving at border crossings, while identifying hidden threats in passing vehicles. Our solutions help law enforcement and border authorities to target trafficking networks by scanning vehicles and their passengers for concealed materials as they pass through checkpoints.
HCVL
Light vehicle inspection system - Able to be configured as either a conveyor or drive-through, the HCVL provides high quality, top-centred, top view X-ray images of light vehicles.

VR In Education - ClassVR

Virtual Reality in Education

Engaging VR and AR educational content for students of all ages

Introducing a whole new concept in educational technology: a 'standalone' Virtual Reality headset complete with a unique student-friendly interface, gesture controls, embedded educational resources and simple-to-use teacher controls. ClassVR is a groundbreaking new technology designed to help raise engagement and increase knowledge retention for students of all ages.

VRLab Academy

VRLab Academy makes scientific labs available to everyone at lowest costs, through the PC and Virtual Reality technology. We provide virtual science laboratories not only in physics, chemistry and biology subjects but also in medical biochemistry and advanced level subjects to students from all ages. Our online education platform is cloud based, works with real scientific formulas and is curriculum correlated. Experiments are suitable from elementary schools up to universities.

We at Digital Technology IT Solution have partnered with VRLab to provide the best VR Experience and Experiment to all school and colleges in Middle East the Experiment list are as follows: VRLab Academy Junior, Chemistry Laboratory, Biology Laboratory, Mechanics Laboratory, Electromagnetism Laboratory, Medical Biochemistry Laboratory, Popular Science, Modern Physics Laboratory, Optics and Waves Laboratory, Thermodynamics Laboratory, Mathematics Laboratory.
Virtual Reality in Healthcare

Virtual Reality is revolutionizing the Healthcare Industry. Digital Technology IT Solutions we believe that immersive technologies are the key to transforming the healthcare industry. Forward-thinking healthcare professionals and technologists are pushing boundaries every day, and we've seen huge increases in demand for cutting-edge digital platforms such as Stamford's Virtual Heart or bespoke VR Training simulators to bring clinical examinations and teaching tools to life like never before.

Virtual Reality has the ability to transport you inside and around the human body, to access and view areas that would traditionally be impossible to reach. Using hyper-realistic CGI, virtual models can be displayed in real-time, allowing clinical practitioners to show patients vital information in greater levels of detail, helping them to visualise their conditions and see how therapies and treatments will work. Patients are better equipped to learn about and understand their conditions from their own homes, and the highest quality medical consultations can be delivered to the most remote locations without any travel required, freeing up valuable medical manpower along the way.

More than just exciting new technologies, AR and VR have been proven to have positive impacts on immersive learning across the healthcare spectrum. In the coming years, Immersive Technologies such as Augmented Surgery will be used more and more to improve the accuracy & effectiveness of current procedures. People's capabilities both as the care-giver and the patient will be enhanced, and access to life-saving information and vital skills will be delivered in ways that no other technology can match.

We Digital Technology IT Solutions have partnered with VISUALISE to meet the demand of healthcare and the changing technology and work with our customer to provide end to end solution meeting all their demands.
